

Reliance Predictive Safety Intelligence

by Reliance EHS

Visible, Connected, and Predictive Safety Operations

Sales Presentation • Steven Sladky, CSP

Environment • Health • Safety

Predict Risk • Validate Compliance • Protect Project Timelines

THE PROBLEM

Safety teams are overwhelmed by scattered information, outdated documents, and inconsistent communication.

01 PAPERWORK OVERLOAD

Multiple forms, documents, permits, and signatures are still being managed manually across the jobsite.

02 SAFETY OBSERVATIONS GO NOWHERE

Observations are hard to close out, trend, and turn into leading indicators without one system.

03 LOST OR OUTDATED DOCUMENTS

Crews need one current source of truth for plans, forms, permits, and safety documents.

04 REACTIVE INCIDENT RESPONSE

Teams often react after issues occur instead of using live data to prevent repeat problems earlier.

05 TRAINING GAPS BETWEEN CREWS

Inconsistent training delivery and tracking create readiness gaps across workers, trades, and crews.

06 INCONSISTENT COMMUNICATION

Communication between GCs, subs, supervisors, and safety teams is hard to standardize and scale.

The result: slow closeouts, weak visibility, and preventable risk.

SAFETY DATA TO SAFETY PREVENTION

ativity, improve readiness, and use AI-driven prediction to prevent incidents before they happen.

ONE PLATFORM. ONE TRUTH. ONE STEP AHEAD.

Capture. Improve. Predict. Prevent. Then continuously improve again.

RELIANCE PREDICTIVE SAFETY TECHNOLOGY

... 5 Core Platform Pillars ...

A unified EHS operating system built for visibility, compliance, operations, insight, and control.

● Medium	1
● Low	1

Overall Compliance

High-risk items are
concentrated in the
immediate-action category,
giving leadership a clear
view of where to focus
resources first.

Active Risk Alerts

8 active alerts

Stop Work Authority — Extreme Risk

Confined Space Entry — Atmospheric and Physical Hazards

Immediate escalation required

Compliance Gap — Chemical

0% — below 70% threshold. Action required.

0%

Compliance Gap — Equipment

0% — below 70% threshold. Action required.

0%

Compliance Gap — Legal

31% — below 70% threshold. Action required.

31%

Compliance Gap — Documents

40% — below 70% threshold. Action required.

40%

Compliance Gap — Training

50% — below 70% threshold. Action required.

50%

Why it matters

Prioritizes the highest-risk
exposures first

Surfaces compliance gaps before
they become incidents

Supports faster action through
one risk view

Audits & Corrective Actions

End-to-end visibility into audit performance, findings management, and CAPA execution

What this
provides

Connects audits directly
to corrective actions

Highlights overdue items
before they escalate

Improves accountability
with clear status tracking

Training & Competency

Role-based training matrix, expiring certifications, chemical-triggered assignments, and completion reporting

Role-Based Matrix

Assigns required training by employee role.

Training Records

Centralizes completion history and records.

Expiring Certs

Tracks upcoming renewals before they lapse.

Course Catalogue

Maps courses to regulatory requirements.

Training Matrix View

	Stop Work Authority	LOTO	Confined Space	Hot Work	Fall Protection	HazCom	JSA	Incident Reporting	OSHA 30	Forklift Operator	Emergency Response
John Haldemann EHS Manager											
John Admin											
Steve Viewer											

Leaders can see who needs which training and where gaps exist across roles.

Course Catalogue & Compliance Mapping

Course	Regulatory Reference	Status
Lockout/Tagout (LOTO)	29 CFR 1910.147	100%
Permit-Required Confined Space Entry	29 CFR 1910.146	100%
Hot Work Safety and Permitting	29 CFR 1910.119 / 29 CFR 1926.352	100%
Fall Protection	29 CFR 1926.502 / 29 CFR 1910.28	100%
Hazard Communication / Chemical Safety	29 CFR 1910.1200	100%
Forklift Operator	OSHA 29 CFR 1910.178	100%

Courses are tied to standards so training requirements stay defensible and audit-ready.

What this provides

Connects roles to required training

Flags expirations before they become compliance gaps

Creates audit-ready records and reports

Chemical Management

Complete visibility and control of chemical inventory, SDS compliance, and safety.

1 Dashboard Overview

Real-time snapshot of your chemical management program.

See key compliance metrics at a glance, including SDS coverage, high-hazard flags, and inventory status to quickly identify risks and gaps.

2 SDS Register

Monitor SDS compliance and identify issues that require action.

Easily review SDS status, filter issues, and take action to close HazCom gaps and stay compliant.

3 Add Chemical

Quickly add chemicals and capture critical safety information.

Add Chemical to Inventory form:

- Quick Fill — Common Chemical
- Search common chemicals — name or CAS, e.g. 'acetone' or '67-64-1'
- Pick a common chemical to auto-fill name, CAS, storage class, hazard codes, and PPE below — then verify against the supplier SDS before saving.
- Chemical Name*: e.g. Hydrochloric Acid
- CAS Number: e.g. 7647-01-0
- Supplier: Sigma-Aldrich, Merck...
- Quantity*: 0.00
- Unit: L (Litres)
- Storage Location*: Lab 3 — Flammables Cabinet A
- Storage Class: — Select class —
- Recommended PPE:
 - EYE / FACE: Safety Glasses, Chemical Splash Goggles, Face Shield
 - BODY: Chemical Apron, Lab Coat / Chemical Coat, Flame-Resistant Clothing
 - ENGINEERING CONTROLS: Local Exhaust / Ventilation
 - HANDS: Nitrile Gloves, Neoprene Gloves, Butyl Rubber Gloves
 - RESPIRATORY: Respirator
 - FEET: Safety Footwear
- GHS Hazard Codes (H-statements): Search H-codes — e.g. H225 or 'Flammable'

Capture all key data points — storage, hazard class, PPE, and H-codes — and verify against the supplier SDS.

Comprehensive tools for safe handling and regulatory compliance.

Chemical Inventory

Track all chemicals with real-time visibility and location details.

SDS Library & Compliance

Ensure current SDS on file for 100% HazCom compliance.

Hazard Classification

Auto-classify by GHS and identify high-hazard chemicals.

Storage Compatibility

Prevent dangerous interactions with compatibility checking.

PPE & Exposure Controls

Recommend the right PPE and engineering controls.

AI High-Hazard Flags

AI identifies risks and prioritizes immediate attention items.

Waste Review

Track chemical waste and ensure proper disposal compliance.

Why It Matters

Stay Compliant

Meet OSHA HazCom requirements with up-to-date SDS management.

Reduce Risk

Identify high-hazard chemicals and address gaps before they become incidents.

Save Time

Centralize chemical data, SDS, and documents for faster access and audits.

Protect People

Ensure proper handling, storage, and PPE to keep employees safe.

Biosafety & Lab Safety

Manage BSL labs, compliance, EOL requirements, risk inventory, and containment assurance.

Agent Registration

Register and track biological agents with risk group classification.

Inventory Management

Maintain accurate biological agent inventory with storage and expiry tracking.

Compliance & Tasks

Monitor critical biosafety tasks and ensure nothing falls through the cracks.

Incident Tracking

Log and manage BSL incidents to support investigations and corrective action.

SOP Library Integration

Access biosafety SOPs and documentation from a centralized library.

Why It Matters

Protect People and the Environment

Ensure safe handling of biological materials and prevent exposure or contamination.

Stay Compliant

Meet CDC/NIH/OSHA and institutional biosafety requirements.

Reduce Risk

Proactively track expiry, inventory, and containment to minimize operational risk.

Operational Confidence

Maintain audit-ready records and demonstrate a strong biosafety program.

Waste Management

Complete visibility. Proactive compliance. Audit-ready records.

Track waste
streams and
profiles

Identify missing
waste codes
before labels
are printed

Monitor
accumulation
limits and
pickup
deadlines

Maintain vendor,
manifest,
inspection, and
training records

Daily Action List

3 items requiring attention — BL-WMP-01 Command Center

- LABEL** Flammable solvent wipes has no EPA/waste code — label & profile incomplete
- LABEL** Corrosive liquid has no EPA/waste code — label & profile incomplete
- LABEL** Aerosol cans has no EPA/waste code — label & profile incomplete

Resolve missing codes and labels to stay compliant. >

Waste Profile Review Pipeline

Draft → EHS Review → Approved → Active

PROFILE NAME	CODE	VER.	SUBMITTED	STATE	ACTIONS
Carbon Dioxide (CO ₂) Gas	—	v1.0	Jun 25, 2026	Active	Approved Jun 25, 2026 Retire
Spent/Waste Acid	D002	v1.0	Jun 25, 2026	Active	Approved Jun 25, 2026 Retire

Approved profiles lock for container assignment and support audit integrity.

Container & Label Control

RCRA label readiness across all streams

TOTAL CONTAINERS	LABEL-READY	NEEDS WASTE CODE	HAZARDOUS
3 In the waste register	0 Code + classification set	3 Missing EPA / waste code	3 Hazardous or scheduled

WASTE NAME	CLASSIFICATION	QUANTITY	LABEL READINESS	ACTIONS
Flammable solvent wipes	hazardous	55 gal	Add waste code	Print Label
Corrosive liquid	hazardous	20 gal	Add waste code	Print Label
Aerosol cans	hazardous	1 box	Add waste code	Print Label

Satellite Accumulation Tracker

EPA 90-day SQG accumulation limit

EPA 40 CFR Part 262 — SQG: 90-day limit • LQG: 90-day limit • VSQG: No time limit • Ref: 40 CFR §262.16(b)(1)

Why it
matters

Improves compliance
Stay aligned with EPA, OSHA,
and state regulations.

Reduces labeling errors
Catch missing waste codes and
classifications before labels
are printed.

Prevents missed pickup deadlines
Monitor accumulation limits and
deadlines to avoid overages
and violations.

**Creates audit-ready
waste records**
Maintain complete records for
inspections and audits.

Ergonomics & MSD Prevention

AI INSIGHTS & GUIDANCE ⓘ

Pattern signal

Based on your responses, this screening provides important ergonomic insights. Safe daily work is built on a combination of postures, concrete in job duties, repetition, movement patterns, and effective recovery. High-risk exposure may lead to injuries.

- ✓ Identify garment and handle contact point controls
- ✓ Ensure luminaire glare and visual comfort
- ✓ Optimize hand truck wheel ergonomics where needed

Identify Risk Early

Quick self-assessments help surface ergonomic risks before injuries occur.

Data-Driven Insights

AI-powered analysis highlights key risk drivers and improvement areas.

Targeted Actions

Focus on the right controls and improvements that make the biggest impact.

OSHA Compliant

Align with OSHA ergonomics expectations and build a strong documentation trail.

Reduce Injuries

Improve worker comfort and productivity while reducing MSD injuries and costs.

A proactive ergonomics program builds a safer workplace, supports compliance, and protects your most valuable asset — your people.

Reports & Analytics

Executive visibility across compliance scorecards, downloadable reports, risk trends, and CAPA performance.

EHS performance.

Illustrative ROI & Cost Savings

Example financial impact based on industry assumptions and company-specific inputs.

Figures are illustrative and should be validated with the organization's actual data.

SAMPLE SAVINGS ESTIMATE

\$512,750
Annual savings estimate

Illustrative ROI: 5.4x

Example savings of \$5.40 for every \$1 spent

Illustrative payback: < 6 months

Time to recoup investment example

ILLUSTRATIVE SAVINGS CATEGORIES

Example sources of annual savings

Amounts are illustrative and will vary by organization.

POTENTIAL BENEFITS

- ✓ **Reduce injury-related costs**
Fewer injuries may help lower medical costs and compensation claims.
- ✓ **Avoid fines and penalties**
Track compliance gaps before they become citations.
- ✓ **Improve productivity**
Reduce manual reporting and duplicate data entry.
- ✓ **Support smarter decisions**
Focus attention on the highest-risk areas first.

TYPICAL COST COMPARISON (Per Recordable Injury)

Use organization data to tailor ROI.

Build a realistic estimate from your environment, incident history, and implementation scope.

PLATFORM TIERS

Flexible tiers designed to grow with your operation

Start with the core tools your team needs, then expand into compliance, document workflows, and predictive insights as your program matures.

Essentials

For teams getting the basics organized

- ✓ JSAs and permits
- ✓ SOR / field observations
- ✓ Audits and inspections
- ✓ Incident reporting
- ✓ Basic dashboards

Professional

For stronger compliance visibility

- ✓ Everything in Essentials
- ✓ Compliance matrix
- ✓ Credential and training tracking
- ✓ Submission workflows
- ✓ Review visibility

Advanced

For document-heavy operations

- ✓ Everything in Professional
- ✓ Safety document builders
- ✓ CSEP / SSP workflows
- ✓ Document exports
- ✓ Admin review queue

Enterprise

For multi-site scale and AI insights

- ✓ Everything in Advanced
- ✓ Predictive model
- ✓ Trend analytics
- ✓ Multi-jobsite visibility
- ✓ Admin controls and support
