

Safety & Compliance Intelligence for Teams That Can't Afford Surprises

Predict. Prevent. Prove.

The Artificial Intelligence (AI)-powered Environment, Health & Safety (EHS), compliance & audit-readiness platform built for safety and compliance teams.

**RELIANCE PREDICTIVE
SAFETY TECHNOLOGIES LLC**

Safety & Compliance Continuous Improvement Cycle

A practitioner's framework for building a living, self-correcting safety management system - aligned to BSL, OSHA, EPA and othr safety standards.

○ Framework: ISO 35001 / ISO 45001

○ Version: v1.0 - 2026

○ Platform: PredictSafeBIO

GOVERNING REGULATIONS

○ 21 CFR Part 11

○ BMBL 6th Ed

○ OSHA 29 CFR 1910

○ EPA / RCRA

○ ISO 35001 Biorisk

○ ISO 45001

○ NIH BSC Guidelines

○ Select Agent Rule

○ DOT Hazmat

1 Identify & Assess

- Hazard inventory
- Risk matrix
- BSL classification
- Regulatory gap review
- JHA by role
- Near-miss indicators

2 Plan & Design

- SOPs / work instructions
- Training calendar
- Engineering controls
- Emergency response
- PPE by exposure
- Validation protocols

3 Implement

- Deploy SOPs
- GHS / hazard labeling
- Safety / OSHA training
- Waste setup
- Commission controls
- Activate EHS platform

4 Monitor & Audit

- Safety walkthroughs
- Internal audits
- Training tracking
- KPI dashboard
- Exposure monitoring
- Calibration / PM logs

5 Investigate / CAPA

- Report within 24 hrs
- Preventive action
- RCA 5-Why / Fishbone
- 30 / 60 / 90 check
- Corrective action
- Regulatory reporting

6 Review & Improve

- Management review
- Update risk register
- Trend analysis
- Feed back to Phase 1
- Benchmarking
- Share lessons learned

CAPA ENGINE - HEART OF CONTINUOUS IMPROVEMENT

KEY PERFORMANCE INDICATORS

● TRIR < 1.0

● Training Completion >= 95%

● CAPA On-Time Closure >= 90%

● CAPA Recurrence < 5%

● Audit Close Rate 100%

● Near-Miss Reporting Trending Up

● SOP Review 100%

● Waste Manifest Accuracy 100%

PredictSafeBIO - AI-Powered Safety & Compliance Platform

Closed-loop digital compliance thread from hazard to verified fix.

Three Core Pillars, Built Around Your Safety Programs

Every program is SOP-controlled, gets scheduled inspections, and rolls up to an overall program audit.

SAFETY PROGRAMS

- ✓ Ergonomics
- ✓ Waste Management
- ✓ Waste Minimization
- ✓ Chemical Hygiene
- ✓ Biosafety (BSL)
- ✓ Emergency Response

Each program → inspections + program audit

COMPLIANCE & INSPECTIONS

- ✓ Lab audits
- ✓ Chemical inventories
- ✓ Waste storage inspections
- ✓ Emergency equipment inspections
- ✓ Program audits
- ✓ CAPA on every finding

Schedule, track and close every inspection

DOCUMENT CONTROL

- ✓ SOP for every program
- ✓ Contractor management
- ✓ Version control & approvals
- ✓ Training records & sign-offs
- ✓ Forms & templates
- ✓ Expiry / renewal alerts

One controlled source of truth

Safety & Compliance Still Runs on Spreadsheets and Luck

Environment, Health & Safety (EHS) and compliance leaders are accountable for outcomes they can't see coming — using tools that only tell them what already went wrong.

Scattered Evidence

Controls, Safety Data Sheet (SDS), training and Corrective & Preventive Actions (CAPAs) live across binders, inboxes and a dozen spreadsheets. Nothing reconciles.

Reactive, Not Predictive

You learn about a gap during the audit or after the incident — never early enough to prevent it.

Audit Prep Is a Fire Drill

Days of manual scrambling to assemble proof for audits and inspections — every single time.

The Cost of Being Wrong

A single failed inspection, recall or breach can stall a program and burn trust with regulators and investors.

WHY IT MATTERS

Reactive Safety Is Expensive — in Time, Money and Credibility

Days

to pull together audit evidence the old way — per framework, per cycle.

1 gap

is all it takes. Findings cascade into Corrective & Preventive Actions (CAPAs), delays and re-inspections.

100%

preventable — with the right early-warning signal in hand.

Illustrative of the operational burden Environment, Health & Safety (EHS) teams describe today.

WHO IT'S FOR

Built for Safety & Compliance Teams Under the Microscope

From an early-stage lab to a multi-site manufacturer — if you get inspected, you're our customer.

Single-Site Teams

Get audit-ready before your first regulator interaction.

Contractors & Service Providers

Prove control to every client and auditor.

Labs & Testing Facilities

Inspection-grade rigor without the binders.

High-Hazard Operations

Biosafety (BSL) and hazardous-materials complexity, finally organized.

Multi-Site Operations

One compliance score across every facility.

Manufacturing & Industrial

Safety programs and Environment, Health & Safety (EHS) in one connected system.

Loved by the people who are accountable: EHS managers, Quality Assurance (QA) / Regulatory Affairs (RA) leads and compliance teams.

THE SOLUTION

One Platform to Predict, Prevent and Prove Biosafety

PredictSafeBIO unifies compliance, risk, vendors, audits and training into one always-on dashboard — continuously scored and audit-ready.

CAPA Tracker

Finding	Source	Owner	Due	Status
Eyewash flow below spec	Emergency Equip Insp.	A. Park	Jun 22	Open
SDS missing for solvent	Chemical Inventory	M. Okoye	Jun 14	In progress
Waste label incomplete	Waste Storage Insp.	T. Lee	Jun 19	Open
Ergonomic risk at bench 4	Lab Audit	J. Rivera	Jun 28	Planned
BSL door interlock fault	Program Audit	S. Diaz	Jun 10	Overdue
Spill kit restock	Emergency Equip Insp.	A. Park	Jun 16	In progress

Live Compliance Score

Every site, every framework — one number, updated in real time.

Escalations That Surface Early

Critical Corrective & Preventive Actions (CAPAs) and overdue items rise to the top automatically.

Built for Life Sciences

Good Practice guidelines (GxP), biosafety levels and Food & Drug Administration (FDA) realities baked in — not bolted on.

The Predictive AI Safety Engine

Our scoring engine reads your controls, incidents and signals to forecast where safety and compliance will break — before it does.

Forecasts Risk, Not Just Records It

Likelihood × impact scoring surfaces the next failure point.

Governed by Design

Guardrails and a “Do Not Claim” policy keep AI advisory — humans decide.

Confidence-Scored & Auditable

Every model run is traceable, versioned and explainable.

Composite Risk Forecast

Predicted vs. observed — next 6 weeks

Forecast crosses the action threshold in ~14 days.

Controlled Documents, Trained People

Version-controlled SOPs for every safety program, forms and policies — with contractor management and live training status.

Version-Controlled Docs

SOPs, forms and templates with approval state and expiry.

AI Gap Analysis

The engine detects missing SOPs and coverage gaps automatically.

Training & Contractor Records

Training status plus contractor onboarding, documents and sign-offs.

Risk You Can See, Score and Rank

A live 5×5 heat map and register — likelihood × impact, inherent vs. residual.

AI Auto-Scoring

The engine scores likelihood × impact and ranks every risk for you.

Register Tied to Controls

Each risk links to the mitigations and evidence that reduce it.

Failure Mode & Effects Analysis (FMEA) Built In

Failure-mode analysis for processes, equipment and assays.

Failure-Mode Analysis, Quantified

Score severity × occurrence × detectability into an Risk Priority Number (RPN) — and fix the highest-risk steps first.

RPN auto-calculated

Severity × occurrence × detectability, ranked automatically.

Process & assay focused

Sample receipt, storage, Polymerase Chain Reaction (PCR) — the steps that actually fail.

Every mode gets an action

No high-RPN failure mode without an owner and a fix.

Always Audit-Ready Compliance

Track every inspection, audit and program control — with evidence and owners attached.

Inspection & Audit Schedule

Inspection / Audit	Program	Due	Owner	Status
Lab Audit	Chemical Hygiene	Jun 18	J. Rivera	Scheduled
Chemical Inventory	Chemical Hygiene	Jun 12	M. Okoye	In review
Waste Storage Inspection	Waste Management	Jun 20	T. Lee	Open
Emergency Equipment	Emergency Response	Jun 15	A. Park	Passed
Program Audit	Biosafety (BSL)	Jul 01	S. Diaz	Scheduled
Ergonomics Walkthrough	Ergonomics	Jun 24	J. Rivera	Scheduled

Inspection & Audit Status

Open, closed and overdue — at a glance, by program.

Evidence Lives With the Finding

Files, tasks and history in one place. No more hunting.

Real-Time Readiness Score

Know exactly how prepared you are for the next audit.

Close the Loop on Every Finding

From an inspection finding or near-miss to a tracked CAPA with an owner and a due date — nothing slips.

CAPA Tracker

Source, owner, due date and status on every corrective action.

Incident Reporting

Spills, near-misses and exposures logged with severity and trend.

Audit Schedule

Internal and Food & Drug Administration (FDA) audits planned, prepped and closed on time.

Six Core Safety Programs – Each Inspected and Audited

Every program carries its own SOPs, scheduled inspections and an overall program audit.

Ergonomics

Workstation assessments, inspections & program audit

Waste Management

Hazardous & biohazard waste handling, inspections & audit

Waste Minimization

Source-reduction tracking, inspections & program audit

Chemical Hygiene

Chemical Hygiene Plan, inspections & program audit

Biosafety (BSL)

Biosafety-level controls, inspections & program audit

Emergency Response

Drills, equipment checks, inspections & program audit

Lab Safety, Handled Day to Day

The day-to-day Environment, Health & Safety (EHS) operations that keep an operation running — and inspectable.

Chemical Inventory & SDS

Chemical Inventory

Chemical	Hazard Class	Quantity	Location	SDS
Acetone	Flammable	4 L	Lab 2 - Cabinet B	Current
Sodium hydroxide	Corrosive	2 kg	Lab 1 - Shelf 3	Current
Bleach (NaOCl)	Oxidizer	5 L	Janitorial	Expiring
Ethanol 70%	Flammable	10 L	Lab 3 - Flam cabinet	Current
Hydrochloric acid	Corrosive	1 L	Lab 1 - Acid cabinet	Current
Isopropanol	Flammable	6 L	Lab 2 - Cabinet B	Current
Formaldehyde 10%	Toxic	2 L	Histology	Expiring

Chemical Inventory & Safety Data Sheet (SDS)

Hazard class, quantity, location and SDS currency per chemical.

Safety Inspections

Scheduled lab walkthroughs with findings tracked to closure.

Emergency Equipment

Eyewash, showers, extinguishers and spill kits — inspected and logged.

Connects to the Tools You Already Run On

No rip-and-replace. PredictSafeBIO layers on top of your existing records and stack.

Airtable Sync

Two-way sync with the bases your team already lives in.

Application Programming Interface (API) Keys & Webhooks

Push events to your stack and pull data in, in real time.

One-Click Export / Import

Portable Document Format (PDF) evidence packs and Comma-Separated Values (CSV) in and out, on demand.

Built on Supabase + Vercel

Modern, scalable, enterprise-grade cloud infrastructure.

SAFETY TECHNOLOGIES LLC

SECURITY & TRUST

Enterprise Trust, Built In

The controls your IT and security reviewers will ask about — already in place.

Role-Based Access

Granular permissions, down to the individual control.

Single Sign-On (SSO) / Security Assertion Markup Language (SAML)

Enterprise identity sign-in with System for Cross-domain Identity Management (SCIM)-ready provisioning.

Encrypted End to End

Your evidence is protected in transit and at rest.

Full Audit Logs

Every change tracked, time-stamped and attributable.

Built on Enterprise-Grade Controls

Architected around the controls you're held to.

Your Data Stays Yours

Configurable retention and export — no lock-in.

A Predictive Platform vs. the Alternatives

What most teams use today — and where each option falls short.

	PredictSafeBIO	Spreadsheets	Legacy Governance, Risk & Compliance (GRC) / Environment, Health & Safety (EHS)	Consultants
Predicts risk before it lands	✓	✗	—	✗
Always-on audit evidence	✓	✗	✓	—
Purpose-built for safety & compliance	✓	✗	✗	✓
Real-time, single score	✓	✗	—	✗
Fast & affordable to operate	✓	—	✗	✗

Comparison reflects the typical capabilities of each approach.

Live in Weeks — Not a Nine-Month Implementation

STEP 1

Connect

Import controls, vendors and records. We map them to your frameworks on day one.

STEP 2

Score

The Predictive Engine baselines your risk and surfaces the gaps that matter most.

STEP 3

Prove

Generate audit-ready reports and forecasts — and stay continuously prepared.

From Reactive Paperwork to Predictive Control

The Old Way

- ✗ Spreadsheets, binders and email threads
- ✗ Audit prep measured in days of scramble
- ✗ Problems found after the incident or finding
- ✗ Generic Governance, Risk & Compliance (GRC) tools that ignore lab reality

PS

With PredictSafeBIO

- ✓ One source of truth, continuously scored
- ✓ Audit-ready exports in minutes, on demand
- ✓ Predictive engine flags risk before it lands
- ✓ Purpose-built for safety & compliance operations

RELIANCE PREDICTIVE
SAFETY TECHNOLOGIES LLC

RETURN ON INVESTMENT

What PredictSafeBIO Pays Back

Days → Hours

Audit-evidence prep collapses from days of scramble to a one-click export.

Weeks Earlier

The predictive engine flags risk weeks before it becomes a finding.

3 Tools → 1

Replaces spreadsheets, point tools and consultant hours with one platform.

Always Inspection-Ready

Walk into any audit with evidence already assembled and scored.

Illustrative of the outcomes teams target with PredictSafeBIO; actual results vary by program.

Pricing That Scales With Your Program

Start with the essentials and grow into the full predictive platform.

Starter

For a single team getting audit-ready fast.

- ✓ Compliance Hub & Risk Register
- ✓ Up to 3 frameworks
- ✓ Auditor-ready report exports
- ✓ Email support

MOST POPULAR

Growth

For scaling teams with multiple sites.

- ✓ Everything in Starter
- ✓ Safety program inspections
- ✓ Predictive AI Safety Engine
- ✓ Multi-site command center

Enterprise

For regulated, multi-org operations.

- ✓ Everything in Growth
- ✓ Unlimited frameworks & sites
- ✓ Single Sign-On (SSO), audit logs & governance
- ✓ Dedicated success manager

RELIANCE PREDICTIVE
